

# Online Giving Solutions

Online giving is a secure, web-based donation window where your donors can manage their one-time and recurring donations to your organization with their computer, tablet or mobile device. The giving platform provides your church with flexibility for collecting funds, simplicity for tracking and managing donations, and the support you need to grow a culture of generosity.

Here are my top four choices that you can review and see which will meet your needs:

1. <https://www.donorpanel.com/>
2. <https://www.easytithe.com/>
3. <https://www.simplegive.com/>
4. <https://get.tithe.ly/>

I have never used these companies so please contact them to make sure they can meet your needs. Their support will be able to assist you in implementing their software on your website.
